

KROPF Solutions

COPA-DATA Partner Spotlight

20 successful years on the market – this is what KROPF Solutions, an establishment of Prozesstechnik Kropf GmbH, stands for. As specialists in industrial automation and as an experienced, reliable and competent system integrator, the company has been working in partnership with COPA-DATA since its founding, and implements automation projects for established industrial companies in Germany as well as beyond European locations.

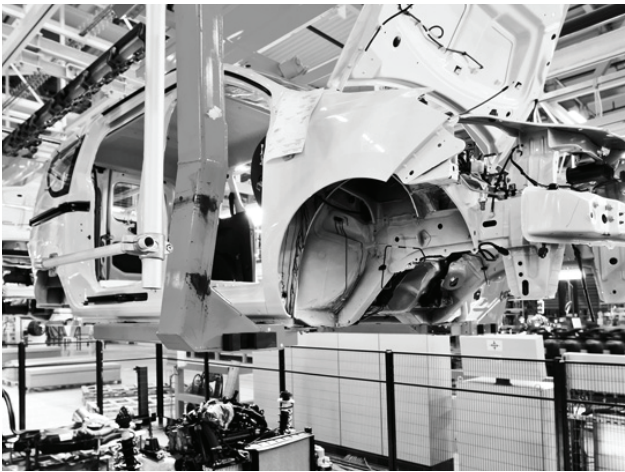

THE PATH TO ZENON

Early on KROPF Solutions identified the need for a new and fully user friendly HMI/SCADA system. While Thomas Punzenberger and COPA-DATA developed the software, Werner Kropf founded a system integrator company fully specialized in the implementation of zenon – the beginning of a unique success story.

“There is no other product within this industry which is able to generate as many objective advantages as zenon – primarily its user-friendly concept and customization possibilities”, explains Werner Kropf, CEO of KROPF Solutions.

THE RANGE OF SOLUTIONS

KROPF Solutions can look back on approx. 20 years of experience with zenon and are proud to be able to offer the whole range of solutions in the zenon Product Family – from zenon Supervisor to zenon Operator to zenon Analyzer and even a mobile solutions. With approx. 50 employees at the four locations in the Czech Republic, Hungary, Slovakia and Germany KROPF Solutions supports companies from the Automotive, Food & Beverage, Pharmaceutical, Energy and Building Automation industries. Here, KROPF Solutions offer a complete array of services from advice and conception, to implementation, right up to training programs and support.

“With the zenon Product Family COPA-DATA is offering the most innovative and reliable automation software on the market. As an Expert Partner we thereby have the optimum solution platform for our numerous challenging projects in the industry.”

WERNER KROPF
CEO, KROPF SOLUTIONS

Since 2014 the company appears on the market as “KROPF Solutions”. The new name reflects the advanced internationalization of the business, as the company now generates almost 50 percent of the turnover abroad or with international companies. “We were already able to establish our new name with our expansion in recent years as well as numerous large assignments from international automobile companies – we offer solutions for automation technology and this now mirrors itself in our name” adds Werner Kropf.

THE PARTNERSHIP WITH COPA-DATA

KROPF Solutions and COPA-DATA have been working in close cooperation for 20 years – in a profitable partnership, that gains from mutual benefits and the development of the zenon software as its goal. Werner Kropf: “Our cooperation is based on a high level of mutual trust and is characterized through receptiveness, and tackling and mastering new challenges together.”
